

Drama 394 Assignment #2 - Block Schematic Creation

Due Date: (All term) April 8th, 2025 9am MT

Purpose: To create a block schematic from an existing installation (to accurately document) independently.

Working individually you will select one existing system (that isn't already clearly documented as a block schematic) and accurately document it using USITT standards.

Suggested Locations:

- BLT/Corner Stage Communications (Program Sound, Comm)
- Timms Mainstage Communication (Program Sound, Comm)
- Timms Mainstage DMX/Lighting Network

To think about: How can you gain access to these locations to accurately document? Will you need to work around room bookings? Are you prepared to research equipment in these installations to verify their connectivity?

Because you have the entire semester to work on this, you must manage your time! Do not leave this until the last minute.

(2) files must be submitted via Canvas. File name will be as follows:

1. DR394W25 BlockschCreation_*Drawing_Title*_FirstName_LastName.drawio
2. DR394W25 BlockschCreation_*Drawing_Title*_FirstName_LastName.pdf

Grading:

Unsatisfactory	Needs Improvement	Exceeds Expectations
Students do not submit their schematics.	Students submit their schematics without their name in filename.	Students submit their schematics in accordance with above guidelines.
F	C	A+
0%	75%	100%
0.0	2.1	4.0
